User Stories

I need an app that provides quick and intuitive access to recipes across the globe

I don't have much time for cooking in the week, so I need to understand time taken to cook quality meals

Some of my friends are worried about calory content in their food. I need to understand calory content per recipe serving

I'd like to upload new recipes and contribute to existing recipes, to share my love and passion for good, wholesome eating

I want to remove unwanted recipes from my collection

Key:
Nouns = Entities
Adjectives = Attributes
Verbs = Relationships

Conversion Model - User story > Conceptual Data Model:

I need an **app** that provides **quick** and **intuitive access** to **recipes** across the globe

I don't have much **time** for cooking in **the week**, so I need to understand **time** taken to **cook** **quality meals**

Some of my **friends** are worried about **calory content** in their food. I need to **understand** **calory content** per **recipe serving**

I'd like to **upload** **new recipes** and **contribute** to **existing recipes**, to **share** my **love** and **passion** for **good**, **wholesome eating**

I want to **remove** **unwanted recipes** from my **collection**
